

COVID

By Lennox Eastman

Covid has changed my life. I miss my friends. I have to quarantine. I wear a mask whenever I leave the house.

Quarantining is new since the pandemic. When someone around me gets COVID, I have to stay home. When I stay home, I have to go to school online. Learning from home is hard because I have to stare at a screen and press buttons to talk. I also can't go to help my uncle fix cars. It's not all bad because when I'm quarantined, I don't have to wake up so early. I can't play with friends because everyone has to stay apart. I miss having sleepovers.

I wish COVID would go away so I could live my life normally. Once the pandemic is over I look forward to not wearing a mask.
