You will write a few paragraphs explaining your experiences over the past year.

Do you remember what you were feeling at the beginning of the pandemic? What were you thinking, feeling, and experiencing? What were your concerns?

What were you feeling at the beginning of this current school year? What were you thinking, feeling, and experiencing? What were your concerns?

How are you right now? What are you thinking, feeling, and experiencing at this moment? What are you hopeful about? What worries you?

Over the year of school. I felt more confident in myself of working and getting help from others and then if they need help I will help them if they need help then I feel good inside when I help them. Then when I'm having a gloomy day my friend behind me will cheer me up. I'm thankful for that. Luke bryan One Margarita

If I am still having a lonely day in 3 period Mr.Reynolds will help me cheer my day up more and i love that. When I started school I had no idea what to expect until I walked into the classroom. I felt amazed inside and I knew it was going to be a good year for me. One thing I was concerned about was how loud it was at lunch. I got used to it. In my life right now I feel grateful that I can go to school and i'm grateful that I have a lot of friends. **luke combs Better Together**
