

My COVID Story
By Chantalise Downing

The first time I got COVID, my mommy ran to her room. I got scared. I heard on the news that some people die from COVID. I thought that I might die too. I was at the all school meeting.

I said, "Did you call my name?"

She said, "No, but it has something to do with you." I said "Did I get COVID?"

She said, "Yes!" I cried so hard. I called my friends. I told them. It was my friend's birthday she had to quarantine because she came over on the weekend when I had COVID.
