

"YOUR NOSE!"-Mr Herwood

Lucas Narrow

March 2020-August 2020-At the start of the pandemic I was pretty bummed out that there's no more school because I actually enjoyed it that year because of my friend but he moved so now I can't see him. I worried about my grades mostly I still passed barely but it very hard to focus when you were at your own home and you could be doing something you enjoyed like when it first started I played a lot of video games and i played so much that they aren't even fun anymore I started playing on my computer it was fun for a little because it's a whole different experience because of they keyboard and not a controller but it didn't last long till it got boring again. Once it got to the summer it was pretty normal I got to hang out with my friends again there wasn't really a difference for me it just felt like normal summer. Other then sometimes I would think I had to do work at random times because I was used to doing online school all day.

September 2020-May 2021-At the beginning of 7th grade I was going two days a week Thursday and Friday and I had my friend who was in the same class so it wasn't so bad because at least I knew someone. When you're in class you can't go anywhere unless its the bathroom or the nurse or something like that so I would look forward to my two specials I had tech and art and I was excited to go to them because you could actually walk there yourself that was pretty much why I liked them. Right now it's like two weeks till i end school and it wasn't really a bad school year i still had fun but it didn't really feel the same,

Concerns for next school year-i'm hoping next year we don't have to wear masks it would be really nice,because when you come back inside from doing something it's pretty hot out most of the time and you can't breathe because of the mask then it gets all wet from your sweat and stuff so it just kinda sucks. But it worries me that i might have to do the same thing next year because you never know the numbers could rise again.

Lovely-by \$not(it fits he beat of the story)

Love me-lil tecca(i listened to this alot over the pandemic)

7AM-lil uzi vert(i started listening to lil uzi over the pandemic)

Crank That (Soulja boy)(me and Jameson Swab listened to this song the last day before we got sent home

Mo Bamba-sheck wes(we would play this song before school in the lunchroom

Hex-80 purppp(i heard about this song over the summer)

Tell em-\$not(was big over the pandemic

Spaceship-parti carti(jameson showed me this song its really good

Left right-lil tecca(was another song i listened to over the pandemic)

Through the storm-polo g(it just goes with the writing)

I'm choosing this because during the first month we got sent home there were no google meets you had to join so I would stay up all night till 5-6 am and I would watch the sunrise then go to sleep and usually wake up at 3-4 pm.
